CSE 489: Mobile Application Development

ARTIFICIAL INTELLIGENCE USAGE DECLARATION

Assignment 1 — VangtiChai Flutter Application

1. Purpose of This Declaration

In accordance with BRAC University's academic integrity policy and the growing need for transparency in AI-assisted work, this document declares the nature, scope, and extent to which Artificial Intelligence tools were utilised during the development of Assignment 1 (VangtiChai) for CSE 489: Mobile Application Development.

2. AI Tool Used

Attribute	Details
Tool Name	Claude (by Anthropic)
Model	Claude Sonnet 4.6
Access Method	Claude.ai web chat interface
Usage Period	June 2026
Purpose	Code generation, structure advice, and documentation drafting

3. Scope of AI Assistance

The following tasks were completed with direct AI assistance:

3.1 Project Structure Design

- The folder layout (lib/utils/, lib/widgets/, lib/screens/) was suggested by Claude after the assignment brief was provided.
- The separation of concerns (business logic vs. widgets vs. screen) was recommended by Claude.

3.2 Code Generation

- Complete source code for all seven Dart files was generated by Claude based on the requirement descriptions from the assignment PDF.
- The ChangeCalculator greedy loop, AppSizes responsive helper, amount_display.dart, change_table.dart, numeric_keypad.dart, home_screen.dart, and main.dart were all AI-generated.
- Keypad layout logic (portrait 3-column vs. landscape 4-column; CLEAR with flex:2) was designed by Claude.

3.3 Documentation

- This assignment report (VangtiChai_Assignment_Report.docx) was drafted by Claude based on the code it generated.
- This AI Usage Declaration was also generated by Claude.
- The README.txt was written by Claude.

4. Student's Own Contribution

The following tasks were completed independently by the student:

- Reading and understanding the assignment brief (CSE_489_Assignment_L1_v2.pdf).
- Providing the correct requirement description to the AI tool, including clarifications about portrait/landscape layout, CLEAR button span, and note denominations.
- Reviewing all AI-generated code for correctness and alignment with assignment requirements.
- Running the application in the Android emulator (Pixel XL and Nexus 10) and verifying behaviour.
- Submitting the work and taking responsibility for the final deliverable.

5. Academic Integrity Statement

The student acknowledges that AI tools were used substantially for code generation and documentation in this assignment. The work is submitted with full transparency. All AI-generated content has been reviewed by the student, who takes complete academic responsibility for the submission.

6. Declaration

I, the undersigned, confirm that the information provided in this document is accurate and complete.
